

Directions for Easy Fat Quarter Quilt Top

1. Use 15 Fat Quarters. Press them to remove or at least reduce wrinkles and creases.
2. Cut each Fat quarter into two 10 inch rectangles as shown below. You should eliminate the selvages when doing this.

3. You will now have 30 large rectangles that are 10 inches wide and about 18 inches long. Lay the rectangles out in a brick like pattern. You can lay them vertically or horizontally in either 6 columns or 8 rows. For the vertical layout you will need to cut 3 of your rectangles in half for the half brick ends and for the horizontal you will cut 4 of the rectangles in half. See the illustrations below. Use $\frac{1}{4}$ inch seam allowances.

Finished Size
About 60" x 70"

Finished size
About 52" x 75"

4. An example of a quilt top laid out in the vertical pattern and ready to sew.
